Order! Order! – Label Holder 8 puts things in order

Whether you want to attach signs to shelving systems, mark workplaces and product storage systems or simply add sorting categories: the new Label Holder 8 in the item MB Building Kit System will ensure a simple-to-use marking system.

A Base Profile made of aluminium with a modular height dimension of 40 mm, which can be attached to any item Profile with a size 8 system groove, acts as a receptacle for an individually printed label and protects it with two side covers and a transparent cover film. Replacing the labels later couldn't be easier: simply slide them out of the holder sideways and insert a new one.

Apart from the ready-made set with a width of 160 mm (normally sufficient for most labels), the Building Kit System also provides for label holders of any required length. In this way, label holders covering the full width of the shelf can be created as easily as small price labels.
